ALL PURPOSE (LIQUID) FERTILIZER

For Lush, Green Growth. Produce lush, green growth while also promoting abundant blooms and fruit.

HIGH BLOOME (LIQUID) FERTILIZER

For Plants and Soil. Improve the quality and quantity of flowers in your garden.

HIGH GROWTH (LIQUID) FERTILIZER

All Season Soil and Plant Fertilizer. Quickly get nitrogen to your plants, producing lush, beautiful plants.

**Fertilizer-** organic fertilizers feed the soil, are long lasting and easy to use. Liquid or granular, in a variety of balanced formulas for your lawn & garden.

**Acid Fertilizer-** use for Rhododendrons, Azaleas, Heather & Heath, Camellias, PNW Natives & Ferns, Dogwoods.

**Rose & Flower; Bud & Bloom-** for blooming trees, shrubs, roses & perennials. Non-acid lovers.

**Veggie & Herb-** use for all vegetables & herbs.

**Palm & Citrus-** Houseplants, Citrus & tropical plants.

**How to Apply Fertilizer-** during initial planting or use "Starter" fertilizer, then apply 2-3 times during the growing season- Mid-March through September. Then top dress or mulch with an acid planting mix, soil building conditioner or harvest supreme soil amendment to conserve moisture, choke out weeds and protect roots.

**Follow directions on the package label.** Organics do not burn, but can rot foliage if applied directly to leaves. Apply fertilizer to soil area by either scratching into soil or applying directly on soil surface then applying a top dress of compost/mulch. Water in after or apply prior to heavy rainfall.

for more information, visit <https://www.kelloggarden.com/faq/> there is also a soil calculator, scroll to the bottom of webpage. We have been using and selling G&B organics for several years and love it! Ask us if you need help or go to one of classes.
